December 7, 2022

Cover letter for the submission titled:
“Invariant Measures for the Nonlinear Stochastic Heat Equation with No Drift Term”

Dear Editor,

We would like to submit our current manuscript to your journal. This work was recently presented by the first author at the *Workshop: Stochastic PDEs and Related Topics* on November 14–16, 2022 at the Brin Mathematics Research Center at the University of Maryland. We would like to thank Yu Gu, Sandra Cerrai, Sergey Lototsky, Samy Tindel and many others for the very useful comments and suggestions that were made during the workshop.

For the possible associative editors for the paper, we would like to suggest *Sergey Lototsky*, *Andrea Nahmod* or *Jacob Bedrossain*. Of the three, we feel that *Dr. Lototsky* would be the most suitable expert related to the subject of the work being submitted.

Regarding the possible reviewers, we would like to suggest the following people:

<i>Yu Gu</i> ,	ygu7@umd.edu,
<i>Sandra Cerrai</i> ,	cerrai@umd.edu,
<i>Sammy Tindel</i> ,	stindel@purdue.edu.

They are experts of the subject and they all attended the first author’s talk recently in the above mentioned workshop. Hence, we feel that they might be good candidates to review the paper.

Thank you very much for handling our paper.

Sincerely,

Le Chen and Nicholas Eisenberg
