

Here are comments for *d1171e49* on the file – *thesis.tex*:

1. The line after (1.2): and $\ln_+(z) := \dots$
2. The paragraph after the centered equation for $I(t, x)$ on p. 2:
 - (a) “consists of a triple”;
 - (b) Fox-H function should be italic, i.e., *Fox-H functions*;
 - (c) “where $\mathcal{F}f(\xi)$... refers to the Fourier transform.”;
 - (d) “ $a > 0$, $b > 0$, $z \in \mathbb{C}$,”;
 - (e) Remove the hyphen between *Gamma-function*.
3. In the expression for $\mathcal{T}_0$ on p. 5, for the case $\beta \in (0, 1]$ (resp. $\beta \in (1, 2)$), replace $\lceil \beta \rceil - 1$ by 0 (resp. 1). Carry out the same simplification in the proof for these cases. Do the simplification whenever possible and Check if you have similar things throughout the draft.
4. Statement of Lemma 2.2, the last sentence should better be updated as “Moreover, when $\beta \in (1, 2)$, ”.
5. (2.9): Remove $t \in [0, T]$ and write $\sup_{(t,x) \in [0,T] \times \mathbb{R}^d}$ instead.
6. The centered equation before (2.11): $(u)^{\rho-1} \rightarrow u^{\rho-1}$. The sentence afterwards, [CHN19] should be (2.4).
7. The sentence after (2.11): “if we now let ”. Add a comma after the next centered equation.
8. Line after (2.13): “It is important to note” $\rightarrow$ “Note that”.
9. Proposition 2.5:
 - (a) In the statement: [CH21, Propositions 2.1 and 2.2].
 - (b) In the statement, no need to write again $Y(t, x) = \dots$. We already know what is $Y(t, x)$.
 - (c) In the statement of case 1, add “, then ” before “there”. The same for case 2.
10. Proposition 2.6:
 - (a) In the statement, Remove “let $a > 0$ and” and put it afterwards: “Then for all $a > 0$, $x, z \in \mathbb{R}$, ...”.

Note: I prefer to use “all” instead of “any”. It is less ambiguous. I learnt this from a math writing class at EPFL.

 - (b) Rewrite the last two lines on p. 7 as:

and $q \in (0, \rho]$ (resp. $q \in (0, \rho)$) under Case 1 (resp. 2) of
Proposition 2.5.

Do the same for the statement of Proposition 2.7.
11. Statement of Proposition 2.7: “Moreover, if we consider the case when”.
12. When using the capitalized word, no need to use “the” in front: Remove the second “the” at the last line of the proof of Theorem 1.2.
