

Here are comments for *9cf2008f* on the file – *thesis.tex*:

1. Address point 1 of “comment3_d117e49.pdf”. [done](#)
2. Address point 2 (b) with “functions” of comment3. [done](#)
3. Address point 2 (c) with “refers to” or you can see “we use ... to denote the Fourier transform”. [done](#)
4. Address point 2 (d) with $z \in \mathbb{Z}$. [done](#)
5. Eq. (2.10): $x \in \mathbb{R}$ should be $x \in \mathbb{R}^d$. Check all similar mistakes throughout the draft. For example, such typos appeared many times in Section 1.3. [done](#)
6. No need to add “then” for point 4 of comment3. The usage is “if..., then...”, or “when, ...”. [done](#)
7. (2.9), forgot a period; check all similar problems. [done](#)
8. One line above (2.11): “recall the subadditivity of the square root, namely, $\sqrt{a+b} \leq \sqrt{a} + \sqrt{b}$ for all $a, b \geq 0$ ”.
Accordingly, line -3 of the proof of Proposition 2.4: “applying the identity ...” $\rightarrow$ “thanks to the subadditivity of the square root”. [done](#)
9. The second centered equations on p. 11 ($\mathbb{P}(\cdots) \leq \dots$), you may change them into one line. [done](#)
